

Project	Nahuelbuta Highway
Type of Initiative	Private
Sponsor	Besalco Concesiones S.A.
Location	Bio Bio and Araucanía Regions
Investment:	US\$ 248 million
	<p>Highway 180, which connects the town of Huequén with the city of Los Ángeles, is a simple two-way carriageway whose capacity has been surpassed by current traffic flows, causing it to offer low safety and operational standards. It is important to note that this road allows connectivity between the municipalities of Negrete, Nacimiento and Los Ángeles in the VIII Region, as well as the municipalities of Angol and Renaico i Region.</p> <p>This project covers the upgrade and expansion of current Highway 180 to a double carriageway, improving standards with over- and underpass crossings with other roads, improved safety conditions, lighting and signposting.</p> <p>The Project model considers charging users of the road a toll to finance the investment..</p>
